## **METHODOLOGY**

**1331 Likely Voters in the Florida** were interviewed in a random sample. Interviews were conducted September 30, 2011. Respondents were screened for voter registration, party identification and voter intent. The poll result was weighted to all know demographic factors. All interviews were conducted by IVR.

**The margin of error for this survey is +-3.00%** with a 95% confidence level. In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias in the findings. Cross Tabs will have a higher margin of error.

**The margin of error for the Republican only sample is +-4.20%** with a 95% confidence level. In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias in the findings. Cross Tabs will have a higher margin of error.

## NARRATIVE

### US Presidential Primary – Republican Only

MOE: 4.0      MOE: 4.2%  
9.20.2011    9.30.2011

	Percent	Percent	Difference
Bachman	5.2%	3.4%	-1.8%
Cain	4.9%	23.70%	18.80%
Gingrich	8.7%	9.80%	1.06%
Huntsman	2.4%	1.80%	-0.65%
Paul	7.5%	3.40%	-4.12%
Perry	24.7%	9.10%	-15.55%
Romney	25.0%	28.20%	3.20%
Santorum	.9%	0.50%	-0.37%
Und	20.6%	20.10%	-0.53%
Total		100.0	

When comparing the 9.30.2011 survey (completed post Florida's P5 RPOF convention) to the 9.20.2011 survey (completed prior to Florida's P5 RPOF convention), we see a significant change in the trend among Republican likely voters.

We observe an 18.8% gain for Herman Cain post P5. This corresponds to a 15.5% point loss for Rick Perry and a 4% loss for Ron Paul.

We also observe a smaller, but statistically valid bump for front-runner Mitt Romney of 3.2%.

Rick Perry statistically shares 3<sup>rd</sup> place along with Newt Gingrich among Florida likely Republican voters.
