Hope you pick Thrasher. Given all he has done, I hope you at least put him on the short list, have Adam tell him he's not it so he can gracefully withdraw saying he needs to keep his commitment to his constituents and fill out his term. He understands you need to make the right political choice with this appointment but it would buy you tons of good will to include him in the list being considered. This is a great opportunity to make a couple of key people feel important by saying they are being contemplated as a replacement. As Rahm Emanuel would say "Never let a good crisis go to waste". BTW...I'm not interested but thanks!
